PROFILE

Full-Stack Developer with 4 years of hands-on experience in React.js, Node.js and PostgreSQL, and a solid foundation in mathematics and algorithms. I designed and built DiploChain from scratch, a blockchain-based diploma verification platform (Solidity/Ganache, IPFS, Web3) graded 16/20 as my final year project. I work across the whole stack, from database design to frontend deployment, and care about clean, maintainable code.
